Food & Beverage Field Services

The ideal solution for all your food and beverage testing needs. With two purpose-built testing centres in the UK, we provide the perfect environment for all your qual and quant data collection.

Our Food & Beverage field service offers:

- Testing within our specially designed testing suites each comprising more than 35 individual assessment booths; high rates of air extraction; options for Northern daylight and red lighting
- High through-put quant testing with on-line data capture
- Experienced product preparation and technical teams
- Dedicated on-site recruitment team
- Spacious high spec preparation kitchens featuring walk-in chilled, ambient and frozen food stores
- A light and airy viewing Studio with Focus Vision streaming
- Trained qualitative researchers and moderators

Sensory Dimensions supports many international and UK field agencies with their field services – talk to us about how we can help you.

Home & Personal Care Fieldwork

A dedicated and specially designed service for testing of fragrance and home and personal care products with consumers

Our testing suite in Nottingham, UK provides:

- 15 individual fragrance booths with high rates of air extraction ideal for the assessment of air care and other fragranced products
- Private bathroom environment for assessment of cosmetics, shave and oral care products
- Shower booths for controlled assessment of hair care, shower and depilatory ranges
- A high spec laundry for cleaning, fragrance and softness assessment
- High through-put quant testing with on-line data capture
- Dedicated on-site recruitment team
- Sample handling laboratory with a fume hood and fire-proof storage
- Trained technical teams

In addition, our Studio in Reading provides the perfect setting for your Home and Personal Care Qualitative research.

Sensory Dimensions partners with many international and UK field agencies to deliver their Home and Personal Care field and lab services – talk to us about how we can help you.
