# KEEP YOUR SUMMER CAMP COVID-SMART

Shield T3 has regional labs throughout the country that enable rapid and high-volume testing at approximately \$35 per processed sample.

Shield T3 is ideal for summer camps because our tests:

- Are highly accurate, lab-based PCR tests that use saliva samples—no nasal swabs!

- Require no refrigeration or specialized storage equipment

- Need no medical personnel to administer

- Deliver results within 6–12 hours after arrival at one of our labs\*

To learn more, visit our website at [ShieldT3.com](https://ShieldT3.com) or contact Jack Regan ([jack.regan@shieldT3.com](mailto:jack.regan@shieldT3.com)) for more information.

\*Testing is also available for camps outside our mobile lab regions, with longer turnaround times due to additional shipping time.
