## WORK FROM HOME? NO PROBLEM!

Due to the current COVID situation, many brokerage firms have arranged staff to work from home. In view of this, eBroker has been providing a suite of software to enable users of different functional departments to carry out their daily work remotely and securely from home. The following are highlights of different applications to be used by different team users.

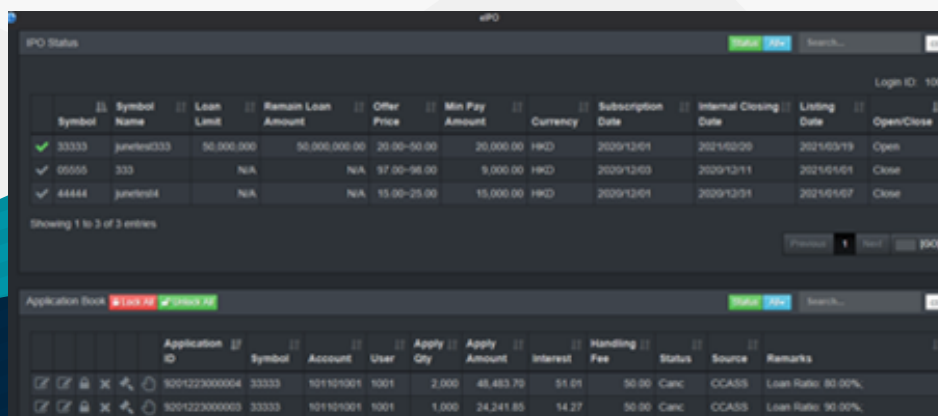

### ACCOUNT EXECUTIVES TEAM

Users of AE Team can make use of IDC3 to retrieve real time market information including real-time prices and charts. You can place orders, check order status, subscribe IPOs, view portfolios, deposit or withdraw funds/stocks on behalf of clients with just a simple click.

### CUSTOMER SERVICE TEAM

Users of customer service team can access information securely via IDC3 to reply clients' enquiries anytime anywhere.

## RISK MANAGEMENT & COMPLIANCE TEAM

IDC3 enables users of Risk Management team to monitor the credit risk exposure of individual client or for the firm as a whole real-time and carry out margin call or cut loss operations if necessary.

## ADMIN TEAM

Our WebSysAdmin program facilitates Administrators to carry out daily updates including rights granting, user and accounts maintenance and audit reports generation as desired.

## MANAGEMENT TEAM

We also provide a BI WebPortal where management team members can monitor the company-wide turnover on a daily basis or in a selected period. The turnover can also be viewed by asset class, by product, by AE, or by channel. The WebPortal is easy to use and provides dashboard function to give an overall view of key figures of management concern.
