---

All our books are in the format ".cab" These files are similar to ZIP files.

To download the books right click on the links and choose "save target as" and choose a location on your hd.

If you're using Windows Me, 2000, or XP, CAB file support is built-in.

If you're using Windows 95 or 98, you'll need the CabView utility (one of Microsoft's PowerToys).

Just double-click a CAB file to open it - files can be extracted by dragging them out of the CAB window
