

# Hands-On Study

**CAD/CAM made easy: How to get your  
digitally - made crowns to fit well**

**Saturday  
24 April 2021  
2pm to 6pm**

**14 SEATS  
ONLY!  
CDE Points  
4**

The use of CAD/CAM technology in dentistry has been widespread and have changed the way dentists treat their patients. As more dental laboratories are harnessing these technology, it has become essential for dentists to be able to prepare and/or scan their patient's dentition in a way that allows for maximum fit and accuracy of the final prosthesis. In this interactive study club, we will be covering more about the principles of tooth preparations in relation to CAD/CAM technology, as well as scanning techniques using different intra-oral scanners to ensure that perfect, stress-free cementation appointment. *This session will be a hands-on programme with the use of CEREC and 3Shape scanners. Participants will get to scan their own models. Strictly limited to 14 participants to comply with safe distancing distancing.*

**FDC ACADEMY**

# OUR FACILITATORS

## Dr Justin Giam

Dr Justin Giam graduated from the University of Melbourne with Honours and was on the Dean's List for his academic achievements. He then worked in Melbourne, Australia before moving back to Singapore to join a prominent dental clinic in the business district of Singapore. He has his own practice with a heavy emphasis on digital dentistry.

As a general practitioner, Dr. Justin delivers a comprehensive range of dental services. He is passionate about CAD/CAM technology and is a certified CEREC trainer. He lectures both locally and internationally and is a key opinion leader for Dentsply Sirona and GC. He utilises it on a daily basis ranging from same appointment restorations to guided implant placements. He loves the control and customisable options that CAD/CAM technology offers to dentists and patients.

## Dr Gordon Tam

Dr Gordon Tam graduated from the National University of Singapore in 2002. He practiced locally in the government and private sectors, and also internationally treating patients from around the world. Dr Gordon embraces challenges. He founded his own private practice to materialise his principle of practising dentistry with his best knowledge skills without

compromise. His visionary practice focuses on state of the art microscopic and digital dentistry. Being an experienced and accomplished general practitioner, Dr Gordon is masterly in dental CAD/CAM techniques at the highest level as a certified CEREC trainer internationally. Dr Gordon provides tremendously bespoke and immensely caring treatment experience for the patients. While learning is a lifelong journey, Dr Gordon is constantly putting his expertise into practice; delivering same day ceramic restorations, comprehensive treatment planning for new patients, smile design to extensive cross-specialisation planning for complex cases. He travels far to acquire new knowledge, improving his skills while lecturing and sharing his insights. Dr Gordon is a mentor of multiple local study clubs. He also attained a mentor status at the CDOCS (CEREC DOCTORS), Spear Education, Arizona, USA. He believes in paying it forward to the newer generation of dental practitioners.
