

Controlworks has been appointed as the exclusive Australian and NZ partner to offer Ecorithm's True Analytics™ platform.

Sydney, NSW – July 20, 2017 - Controlworks has been recently appointed as the exclusive Australian and NZ partner to offer Ecorithm's True Analytics™ platform.

Ecorithm is a leader in the application of advanced analytics to building operations with proven successes in commercial buildings, campuses, hospitality, healthcare facilities and more. Ecorithm's True Analytics™ platform analyses building data and provides specific, actionable recommendations for building operators and owners to create more comfortable, more energy-efficient and better-maintained buildings.

Controlworks is a leader in building automation and energy management. Controlworks' solutions help companies maintain safe, productive and comfortable work environments both within the building and beyond – reducing operating costs, optimising system efficiency and maximising return on investment.

"We're confident that this partnership will allow us to provide more complete solutions and advanced analytics to our customers. We look forward to working together to help our customers turn the plethora of their building data into true corrective actions." Said Steve Taylor, Controlworks' Director of Sales.

"We are very pleased to form a strategic partnership with Controlworks that will allow us to collectively drive the growth of smart building technologies in Australia and New Zealand. Controlworks is already a leader in building automation and we believe that our True Analytics™ technology will provide additional value to their current and future customers." says Don Kasper, VP of Operations for Ecorithm.

A number of pilot projects have been already completed, where Controlworks and Ecorithm have worked together to bring advanced analytics to building operations. Thanks to the implementation of Ecorithm's True Analytics™ platform building operators are now able to gain unprecedented visibility and understanding of their building data that enables them to realize numerous benefits including:

- Reduced energy consumption
- Improved maintenance efficiency
- Improved occupant comfort
- Better capital planning decisions

We welcome the opportunity to speak with you and arrange a free assessment on how Controlworks and Ecorithm can help you turn your building data into true insights.

About Ecorithm

Ecorithm, Inc. is a data analytics company that transforms massive quantities of data from complex systems of networked devices into clear, accurate and actionable intelligence for its customers; simply and automatically.

Ecorithm's True Analytics™ Software-as-a-Service (SaaS) solution provides *Automated* Fault Detection and Diagnostics (AFDD) for HVAC systems in commercial and institutional buildings. True Analytics uncovers the root causes of wasted energy, unnecessary equipment wear, and uncomfortable spaces in buildings with unmatched accuracy, speed, and cost-effectiveness.
