About ICMCER Conference:

The primary goal of the 2nd International Conference on Multidisciplinary and Current Educational Research (ICMCER – 2021), is to shed light on the hurdles linked to the practical administration of all the most modern information being produced in educational research, from a multidisciplinary perspective. Today, more than ever, budding academics, scholars, and researchers in the initial degrees of their careers are discovering it to be increasingly difficult to keep up-to-date with advancements that are taking place. This convention strives to assist them in keeping up with all these developments.

The intention of the 2nd International Conference on Multidisciplinary and Current Educational Research (ICMCER – 2021), is for authorities, academics, professionals, and students involved in educational research from a multidisciplinary perspective, from all over the globe, to gather collectively and bestow contemporaneous research findings that familiarize and enlighten participants concerning the advancements that have been taking place

The 2nd International Conference on Multidisciplinary and Current Educational Research (ICMCER – 2021), supports all researchers (budding and veteran) to present their investigative research outcomes by exhibiting appropriate study articles/presentations/papers at the event, no matter what particular discipline of educational research, they practice in. Those responsible for the most excellent research articles will be rewarded well. They will obtain an unbelievable chance to have their research conclusions and outcomes distributed in prime publications and magazines known and recognized throughout the world. This will not only assist them in obtaining the required exposure that they require to spread the word about their investigative work amongst international research societies but additionally pave the way to a host of unbelievable possibilities for funding and carrying out advanced research projects.
