

NHS Derby and Derbyshire CCG

2020 NHS Staff Survey

Summary Benchmark Report

NHS Derby and Derbyshire CCG

2020 NHS Staff Survey

Organisation details

Completed questionnaires **393**

2020 response rate **83%**

➤ [See response rate trend for the last 5 years](#)

Survey details

Survey mode **Online**

Sample type **Census**

This organisation is benchmarked against:

CCGs

2020 benchmarking group details

Organisations in group: **51**

Median response rate: **80%**

No. of completed questionnaires:
9,808

Key features

Question number and text
(or the theme) specified
at the top of each slide

Question-level results are always
reported as percentages; the **meaning
of the value** is outlined along the axis.
Themes are always on a 0-10pt scale
where 10 is the best score attainable

Colour coding highlights best / worst
results, making it easy to spot questions
where a lower percentage is better – in such
instances 'Best' is the bottom line in the table

 **Keep an eye out!**

Number of responses
for the organisation
for the given question

'Best', 'Average', and 'Worst' refer to the
benchmarking group's best, average and worst **results**

Full details on how the scores are calculated are provided in the **Technical Document**, under the Supporting Documents section of our [results page](#)

Theme results

The calculation for the immediate managers theme has changed this year due to the omission of one of the questions which previously contributed to the theme. This change has been applied retrospectively so data for 2016-2020 shown in the charts are comparable for this theme, however these figures are not directly comparable to the results reported in previous years. For more details please see the [technical document](#).

NHS Derby and Derbyshire CCG
2020 NHS Staff Survey Results

Theme results – Covid-19 classification breakdowns

NHS Derby and Derbyshire CCG
2020 NHS Staff Survey Results

Covid-19 questions

Staff were asked four classification questions relating to their experience during the Covid-19 pandemic:

- | | | |
|--|--|--|
| a. Have you worked on a Covid-19 specific ward or area at any time? | <input type="checkbox"/> Yes | <input type="checkbox"/> No |
| b. Have you been redeployed due to the Covid-19 pandemic at any time? | <input type="checkbox"/> Yes | <input type="checkbox"/> No |
| c. Have you been required to work remotely/from home due to the Covid-19 pandemic? | <input type="checkbox"/> Yes | <input type="checkbox"/> No |
| d. Have you been shielding? | <input type="checkbox"/> Yes, for myself | <input type="checkbox"/> Yes, for a member of my household |
| | | <input type="checkbox"/> No |

The charts on the following pages show the breakdown of theme scores for staff answering 'yes' to each of these questions, compared with the results for all staff at your organisation. Results are presented in the context of the highest, average and lowest scores for similar organisations.

Comparing your data

To improve overall comparability, the data have been weighted to match the occupation group profile of staff at your organisation to that of the benchmarking group, as in previous charts. However, there may be differences in the occupation group profiles of the individual COVID-19 subgroups. For example, the mix of occupational groups across redeployed staff at your organisation may differ from similar organisations. This difference would not be accounted for by the weighting and therefore may affect the comparability of results. As such, a degree of caution is advised when interpreting your results.

Further information

Results for these groups of staff, including data for individual questions, are also available via the [online dashboards](#). Please note that results presented in these dashboards have not been weighted where no benchmarking takes place and so may vary slightly from those shown in this report.

Average	67.0%	71.0%
Worst	52.3%	59.1%

Workforce Equality Standards

NHS Derby and Derbyshire CCG
2020 NHS Staff Survey Results

This section contains data required for the NHS Staff Survey indicators used in the Workforce Race Equality Standard (WRES) and Workforce Disability Equality Standard (WDES). Data presented in this section are unweighted.

Full details of how the data are calculated are included in the Technical Document, available to download from our [results website](#).

Workforce Race Equality Standard (WRES)

- This contains data for each organisation required for the NHS Staff Survey indicators used in the Workforce Race Equality Standard (WRES). It includes the 2017, 2018 and 2019 trust/CCG and benchmarking group median results for q13a, q13b&c combined, q14, and q15b split by ethnicity (by white / BME staff).

Workforce Disability Equality Standard (WDES)

- This contains data for each organisation required for the NHS Staff Survey indicators used in the Workforce Disability Equality Standard (WDES). It includes the 2018 and 2019 trust/CCG and benchmarking group median results for q5f, q11e, q13a-d, and q14 split by staff with a long lasting health condition or illness compared to staff without a long lasting health condition or illness. It also shows results for q26b (for staff with a long lasting health condition or illness only), and the staff engagement score for staff with a long lasting health condition or illness, compared to staff without a long lasting health condition or illness and the overall engagement score for the organisation.
- The WDES breakdowns are based on the responses to q26a ***Do you have any physical or mental health conditions or illnesses lasting or expected to last for 12 months or more?*** In 2020, the question text was shortened and the word 'disabilities' was removed but the question and WDES results still remain historically comparable.

Workforce Disability Equality Standard (WDES)

The approach to calculating the benchmark median scores and the way in which the data for Q13d are reported has changed this year. These changes have been applied retrospectively so historical data shown in the average calculations and all figures for Q13d are comparable. However, these figures are not directly comparable to the results reported in previous years. For more details please see the [technical document](#).

Appendices

NHS Derby and Derbyshire CCG
2020 NHS Staff Survey Results

Appendix A: Response rate

Appendix B: Significance testing - 2019 v 2020 theme results

The table below presents the results of significance testing conducted on this year's theme scores and those from last year*. It details the organisation's theme scores for both years and the number of responses each of these are based on.

The final column contains the outcome of the significance testing: ↑ indicates that the 2020 score is significantly higher than last year's, whereas ↓ indicates that the 2020 score is significantly lower. If there is no statistically significant difference, you will see 'Not significant'. When there is no comparable data from the past survey year, you will see 'N/A'.

Theme	2019 score	2019 respondents	2020 score	2020 respondents	Statistically significant change?
Equality, diversity & inclusion	9.1	362	9.4	384	↑
Health & wellbeing	6.0	366	6.9	386	↑
Immediate managers †	7.4	364	7.8	387	↑
Morale	6.0	359	6.4	382	↑
Quality of care	6.6	186	7.0	192	↑
Safe environment - Bullying & harassment	9.0	362	9.2	367	Not significant
Safe environment - Violence	10.0	364	10.0	386	Not significant
Safety culture	6.5	361	7.0	381	↑
Staff engagement	6.4	366	7.0	391	↑
Team working	6.7	362	6.9	388	Not significant

* Statistical significance is tested using a two-tailed t-test with a 95% level of confidence.

† The calculation for the immediate managers theme has changed this year due to the omission of one of the questions which previously contributed to the theme. This change has been applied retrospectively so data for 2016-2020 shown in this table are comparable. However, these figures are not directly comparable to the results reported in previous years. For more details please see the [technical document](#).
